

Templates - instructions -

Six templates have been prepared to support the implementation and application of the Participatory Research Partnership model. The numbering of the templates reflects the recommended order of use, with the exception of the sixth template, which can be used throughout the participatory research partnership. The templates can be used alone or in parallel, meaning that following the numerical order is not mandatory.

The first template helps the team members get attuned to the research partnership by getting to know each other and describing the research team. The second template helps identify the individual agency of research partners and build co-agency in the research team. The third template helps define common practices in the research partnership. The research partners can use the fourth template to agree on tasks and responsibilities. The fifth template promotes reciprocal planning of the research. The sixth template is a tool for performing a developmental evaluation of the research partnership.

Templates for the model

Template 1:

Getting to know your research partners

Template 2:

Agency in the research partnership

Template 3:

Defining the practices of the research partnership

Template 4:

Agreeing on tasks in the research partnership

Template 5:

Planning in the research partnership

Template 6:

Developmental evaluation of the research partnership

Template 3

Defining the practices of the research partnership

The practices of the research partnership are jointly defined by the members of the research team, who deliberate and agree on the purpose and principles of the collaboration and the rules directing the activities. This is the time to hear the thoughts of each research partner, giving space and encouraging everyone to bring their individual expertise to the table – including different, even opposing ideas.

Co-development methods can be used in deliberative judgment. The process of co-deliberation and the jointly made agreements should be described in the template.

The results obtained from template 2 may be useful when completing this template.

The results obtained from this template (3) may be useful when agreeing on tasks in the research partnership in template 4.

Template 3

Research team (participants):

Collaboration practices in the research partnership

A. How is deliberative judgment carried out?

B. What was jointly agreed?

1.
Purpose of the activities:
Why is collaboration important in this specific research? What is the purpose of the activities?
E.g.

- creating a multi-perspective network
- enabling the participation of research partners before preparing a plan

a.

b.

2.
Principles and rules directing the activities:
What is equal and reciprocal interaction like? How does the operating environment promote flexible and meaningful methods of participation? How are decisions made together? How are successes and handled together? What kind of a schedule is used in joint activities?
E.g.

- enabling proactiveness and advance preparation
- ensuring the adequacy of information by different means (images, videos)

a.

b.

Template 3

A large, empty rectangular area with rounded corners, intended for writing or drawing.
